Dear Supreme Court  
Re: Court rule No. 2003-47

Why is Michigan Supreme Court considering taking steps away that would effective the law by denying Michigan Asbestos Disease victims right to a jury trail? By doing this will hut the working class citizens. Every opportunity should be made for everyone to have the right to a trial by jury. You must hold the corporations accountable for their misconduct and have them take responsibility for the bad action in regards to the asbestos

Sincerely yours,
